

STD Glass:

# LEADING IN THE DOMESTIC MARKET; EXPANDING TO INTERNATIONAL MARKETS

This article gives us an overview of one of Azerbaijan's leading container glass manufacturers, founded in 2000 to produce glass containers for the food and beverage industry.

**S**TD Glass is a division of STD Group (Santexdetal Ltd.) established by Sarkhan Huseynov in 2000, which started to produce glass containers for the food and beverage industry under the trademark STD.

STD GLASS is located in Sumgait – the second industrial city of Azerbaijan – which is about 30 kilometres from Baku. The company is staffed by engineers, technologist, marketing

managers, who have studied abroad, along with highly skilled local operators able to solve and overcome each and every kind of difficulty related to the use of glass forming machines.

### COMPANY PRODUCTION

STD Glass manufactures all kinds of glass bottles and jars needed by the domestic Azerbaijan market. STD Glass manufactures at affordable prices and this economic approach enables its customers to have the desired products with the highest quality. Moreover, STD Glass offers fundamental services, such as:

1. production and delivery of standard jars and bottles;
2. design, production and delivery of exclusive jars and bottles;
3. deliver of original moulds directly to customers.

The company manufactures transparent glass containers which are used in the food and beverage industry for multi-purposes, with volume ranges of 100-3000ml.

Additionally, STD Glass produces glass bottles for beverage industries such as milk, mineral water, soft drinks, beer, wine and beverages, including the spirits sectors with volume ranges of 200-1000ml.

At present, STD Glass manufactures glass containers for the biggest nutrition brands of

Azerbaijan, such as, Slavyanka (Azerbaijan mineral water), Falken (Germany beer) etc.

### EXPANDING

Now one of the leading glass companies of Azerbaijan, STD Glass is planning to expand and launch its services in the neighbour country Georgia.

STD Glass plant consists of the following areas:

1. raw material preparation area
2. glass melting area
3. manufacturing area
4. quality control

5. packaging area
6. finished product warehouse
7. auxiliary equipment and tools area
